Wall Mount Air Handlers 2 Tons With Factory Installed 8 KW Heater

HP models
GMV2APB26081SA

The GMU and GMV series air handlers are designed for wall mount or flush mount installations in a closet, utility room, alcove, or basement. These versatile units are applicable to air conditioning and heat pump applications. Several models are available to meet the specific requirements of the outdoor equipment. Electric resistance heaters are factory installed.

Using a digital psychrometer, measure the return air wet-bulb temperature at the unit just before the coil. Also measure the outdoor dry-bulb temperature. Use these temperatures to locate the target superheat on the charging table. Do not attempt to charge the system if these conditions fall outside of this charging table. ADD refrigerant to DECREASE total superheat. REMOVE refrigerant to INCREASE total superheat. Always allow 10 to 15 minutes of operation after any refrigerant or air flow change prior to determining the final superheat.

Product Specifications

MODEL	GMV2APB26081SA
RATED VOLTS/PH/HZ	208-230/1/60
RATINGS	See O.D. Specifications
INDOOR COIL — TYPE	Plate Fin
Refrigerant Control	TXV
Drain Conn. Size. (in.)	3/4" NPT
FACTORY INSTALLED HEATER	8 KW
DUCT CONNECTION	10.75 x 16.00
INDOOR MOTOR — TYPE	PSC
Diameter-Width (in.)	10 — 6
No. Used	1
Drive — No. Speeds	Direct — 5
CFM vs. in.W.G.	See Airflow Table
