

# 4YCL4 ULTRA-LOW NOx

PACKAGED UNIT

The RunTru by Trane® Ultra-Low NOx gas/electric packaged unit offers a new option for high-efficiency cooling and heating performance that also reduces emissions of nitrogen oxides (NOx).

Engineered with a pre-mix burner design, the RunTru Ultra-Low NOx packaged unit provides a reduction in nitrogen oxides compared to standard packaged units. In addition, these units are equipped with reliable components, such as a high-efficiency condenser, a multi-speed compressor and evaporator coils to prevent corrosion. With an Annual Fuel Utilization Efficiency (AFUE) rating of 81, and a Seasonal Energy Efficiency Ratio (SEER2) of 13.4, the 4YCL4's design ensures the unit is working at peak efficiencies in both heating and cooling modes.

▶ **Low NOx Emissions**

Emits less NOx than a standard packaged unit, reducing carbon emissions.

▶ **Durable and Innovative Design**

Protective paint and wire guards provide durability and protection from the elements.

▶ **Quiet Operation**

Provides a dBA of 71-78, allowing for a quieter home environment.

▶ **High Altitude Testing**

5,000 ft certified ensures high altitude regions are covered.

▶ **Versatile Installation**

Optional installation on slabs or rooftops provide installation flexibility.

▶ **Dual Powered**

Gas and electricity allows the reliability of electric cooling and the efficiency of gas heating in one reliable unit.
